

Long term partnerships bring real added value and customer benefits

Sensofar, is a leading metrology and medical device company, that have been working with ARRK's team in Barcelona for over 15 years in support of their prototype and manufacturing requirements. The two companies have built a strong understanding of each other's needs and expectations and together they have developed a formidable working partnership. ARRK's ethos is to foster long standing relationships with clients, to build trust and add value to the client's project. We want to be the clients "go to support partner"!

ARRK has assisted Sensofar's designers and engineers with a variety of projects over the years, from individual prototype components right through to the scheduled supply of low volume production parts.

ARRK's wealth of experience in 3D printing, prototyping and low volume production solutions has helped to ensure Sensofar's projects run smoothly and effectively as possible. Our project managers guide and advise clients, on the range of processes and materials available that best fit their needs to deliver a winning partnership. We look forward to supporting the team at Sensofar for many more years to come!

SENSOFAR

Key Supplier Requirements - Sensofar demanded & ARRK met

Zero quality defects - This is always a requirement from suppliers like ARRK.

All parts must be delivered to Sensofar to the highest technical and aesthetic specifications.

As Sensofar products are, high added value, premium products, quality finishing is of utmost importance.

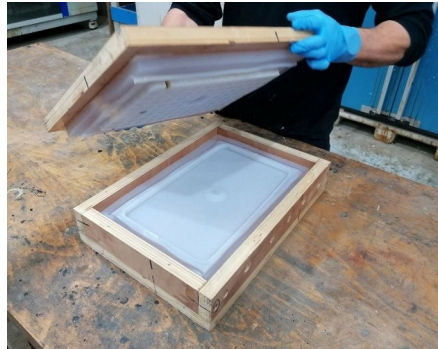

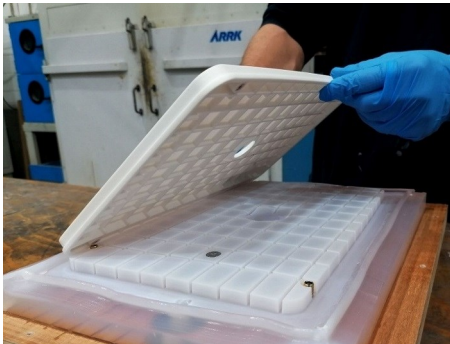

Case Study
