

Introducing our new **Hybrid Carbon** service.

Tough, durable parts as an affordable option

Using our Continuous Fibre Fabrication service, ARRK can offer parts built in Carbon / Onyx materials. Having invested in a new Markforged machine we believe the addition of these new materials to our range provides customers with even greater choice and flexibility. Our Hybrid Carbon offering is also designed to work with most budgetary requirements.

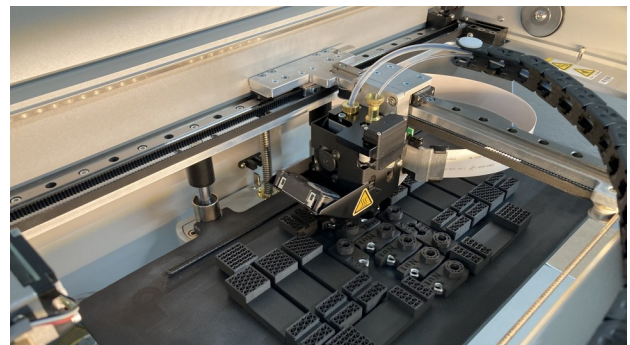

Hybrid Carbon. Great strength to weight ratio

- ✓ Ideal solution for small, low volume quantities
